

# A Seminar on Copyright and AI

Dr. Manoj E Patil

Computer Engg.

## Activity Report

Academic Year	2024-25
Program Driven by	
Quarter	III
Program / Activity Name	Capacity Building Program
Program Type	
Program Theme	Innovation and startups
Start Date	08-03-2025
End Date	08-03-2025
Duration of the Activity (in Mins)	60
Number of Student Participant	0
Number of Faculty Participant	70
Number of external Participant	--
Expenditure Amount in Rs.	
Any Remark	--
Mode of Session Delivery	Offline
Objective	
Benefit in terms of Learning / Skills / Knowledge obtained	
Feedback	
Video url (mp4)	
Photograph 1 (jpg)	Attached
Photograph 2 (jpg)	Attached
Overall report of the Activity (pdf)	As given below

Dr. P. H. Zope  
Convener IIC

## 1. Introduction

Artificial Intelligence (AI) has emerged as a transformative technology, revolutionizing industries including healthcare, finance, art, and education. However, its rapid development has brought forth several legal and ethical challenges—most notably, in the area of **copyright law**. This seminar addresses the complex relationship between **AI-generated content** and existing copyright frameworks, examining issues such as authorship, ownership, infringement, and fair use.

---

## 2. Understanding Copyright

Copyright is a legal right that grants the creator of an original work exclusive rights to its use and distribution, typically for a limited time. It applies to literary works, music, films, software, and other creative outputs. Key components of copyright include:

- **Originality**
  - **Fixation**
  - **Authorship**
- 

## 3. AI and Content Creation

AI technologies—especially those involving **machine learning** and **generative models**—are now capable of creating content such as:

- Text (e.g., GPT, ChatGPT)
- Images (e.g., DALL·E, Midjourney)
- Music (e.g., Amper Music, AIVA)
- Code (e.g., GitHub Copilot)

The question arises: *Who owns this content—the AI, the user, or the developer of the AI?*

---

## 4. Legal Challenges and Case Studies

### 4.1 Authorship and Ownership

Under current copyright laws in most jurisdictions, only human beings can be authors. This presents a challenge when:

- AI generates content autonomously.
- There is significant user input, but the output is produced by AI.

**Case Example:** The U.S. Copyright Office rejected copyright registration for a piece of art generated by an AI called “Creativity Machine,” citing lack of human authorship.

### 4.2 Training Data and Infringement

AI models are trained on large datasets, often scraped from copyrighted content. Legal concerns include:

- Whether such use constitutes **fair use** or **copyright infringement**.
- Whether derivative works infringe on original content creators’ rights.

### 4.3 Fair Use Doctrine

Some jurisdictions (e.g., U.S.) allow certain unlicensed uses of copyrighted content under the “fair use” doctrine. AI-generated content challenges traditional fair use analysis due to the scale and opacity of training processes.

---

## 5. Regulatory Responses

Some proposed or ongoing responses include:

- **EU AI Act and Copyright Directive** – seeking transparency in AI training datasets.
- **US Congressional Hearings** – evaluating AI’s impact on copyright.
- **India’s Position** – still evolving, with recent deliberations by MeitY and the IP Office.

---

## 6. Ethical Considerations

- **Attribution:** Should AI tools give credit to creators whose works influenced the output?
- **Creativity vs. Plagiarism:** Is AI enhancing creativity or enabling mass plagiarism?
- **Economic Impact:** Potential displacement of creative professionals.

---

## 7. Conclusion

The intersection of AI and copyright law is a fast-developing legal frontier. While AI offers vast potential for innovation and creativity, it also challenges long-held notions of authorship, ownership, and originality. There is a pressing need for updated legal frameworks that balance innovation with protection of intellectual property rights.
